5. Notes, Decisions, Issues

Topic	Owner	Time
SQL: Was going to use MySQL but it requires too many dependencies and a server to run on so; we Shifted from MySQL to the use of SQLLite$_3$ since it is supported by ruby natively.	Pareek Ravi	6:30pm
Rest Server: Post command,works fine via webbrowser and localhost testing on port 8080, get command is showing to be a bit more tricky. Decided to use a javascript loop to check for an updated json file to retrive input from to get a proejct ready and tested for the presentation.	Kunal Shah Pavithran Pathmarajah	7:00pm
Graphing: Used a cross check command to minimize the number of edges to be cheked later, but the crosscheck is also giving some false psotivies on edges. Decided to allow it for now, sicne it stil leffectively rmeoves the majority of corssing edges.	Pedro Oliveira Pavithran Pathmarajah	7:30pm
